

How does the **NIH** fit into the biomedical innovation ecosystem?

The National Institutes of Health

sits at the center of the biomedical innovation ecosystem — funding, facilitating and conducting research through its 27 institutes and centers, as well as training the next generation of biomedical innovators. It is the power behind the global leadership of America's life sciences industry.

46% of all basic research in the U.S. is conducted at academic research institutions, with most of that research funded by the federal government
